## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-21 and 43-63, drawn to a method of forming a metal feature on a substrate using a stamp, classified in class 427, subclass 304.
  - II. Claims 22-42, drawn to a method of forming a metal feature on a substrate using a mold, classified in class 264, subclass 129.
  - III. Claims 64-79, drawn to an apparatus for application to a substrate, classified in class 118, subclass 264.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Groups I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are unrelated in that the method of Group I uses a stamp and the method of Group II uses a mold to form the metal features on the substrate, while Group I does not require using the mold and Group II does not require using the stamp.
3. Inventions of Groups I-II and III are related as processes and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this

Art Unit: 1762

case the apparatus of Group III can be used to performing a materially different method other than those of Groups I-II, such as where the substrate is not further coated or plated with metal.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and the search for one group is not required for the other group(s), restriction for examination purposes as indicated is proper.

5. A telephone call was made to Rory Radding on October 22, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
